

Lake Cable, LLC and its affiliates manufacture all of our wire and cable product offerings in the United States of America.

One hundred percent (100%) of the manufacturing occurs in Bensenville, IL and/or Valparaiso, IN. Our wire drawing and fabrication is done at Lake Cable's Elkhart, IN location.

The majority of all copper, shielding, barrier tape, insulation and jacketing compounds are purchased from U.S. based metals and plastics companies that manufacture all but a few select materials in the United States.

- Made in America Act H.R. 1613 (19/3/2009)
- The National Manufacturing Strategy Act
- H.R. 4692 (28/7/2010)
- U.S. Manufacturing Enhancement Act H.R.4380 (Aug 11, 2010)
